Dear friends,

Today is march the 4th 2006. My last newsletter was in january. I had mentioned in my previous newsletter that India would join hands with USA and become very strong. As you all must have heard that George Bush and the Indian prime minister signed a nuclear deal yesterday. This is going to be good for the progress of both the countries. I had also said that USA is going to do good from this year with trades and transactions with other countries.

Now, in march, some planets move very positively. Mercury became retrograde on 2 nd and re-enters aquarius on 10th march with sun. Some bill or contract will be signed by the US govt which will be for good. Sun enters pisces on march 14th. Then April 3rd, Mars moves into gemini. The next 30 days would be very significant for the govt. The country would gain in many ways. America is going through the sub period of ketu until August, thereafter the sub period of venus will be excellent for the country.

But mid June through July could be a danger period. Some land disaster might take place. This may happen at the south to southwest coast of America. A similar thing may also happen in south east Asia.

For personals, those who have who have gemini, libra and aquarius rising at the time of birth will have a very very positive time of their life. Things just start happening for them and they would experience a very fortunate time in July/August.

Scorpio, pisces and capricorn rising could have a very challenging time this July/August. People going thru the seven and a half year saturn cycle will have a hard time too. But relief for them comes from October.

Overall, a good year for America and for all generally.

While 2005 could have been a year of some bad events, this year will make some history of some sorts in a positive way. Like I said earlier, the divine hand will come into play for many.

God bless

Dr. Rakesh Kumar

Chairman
