Dear friends

As of today, the Sun is in Libra, Moon in Leo, Mercury in Virgo, Venus in Scorpio, Mars in Libra, Jupiter in Sagittarius, Saturn in Leo, and Rahu in Capricorn, with Ketu opposite in Cancer.

The Sun and Mars are both under the influence of Saturn. The Sun moves on November 15th and Mars on November 7th. These two planets play a significant role in the Financial crises and the real estate/mortgages issues. Therefore with effect from November 15th, I do see the financial situation getting better.

But there are some key factors that America needs to incorporate in their policies and the constitution. Firstly, America should work together with at least 4 countries to resolve this financial crises. Of these, two should be from the East, of which India could be one.

They should allow foreign investments and open free trade in the USA. Foreign countries should be allowed to invest in properties in the U.S. even if not giving them citizenship, but non resident ownership. Import-Export policies should be more relaxed and some major international currencies should be accepted in the US.

The war, and development of warheads should be stopped immediately and peace be made with all countries. Initiate total Nuclear disarmament for the world, and work in harmony with all countries.

All these thousands and thousands of Green card lottery should be stopped, and the system of giving out Green card lotteries should be abolished. As it is, there are no jobs for people here, and the country invites hundreds and thousands of people to come and live in America, when the country itself is struggling hard to survive!

Millions of dollars of grants that are given out to institutions of arts, music, culture and other such traditional entertainment categories should be stopped and grants should be only given out for educational, scientific, health, spiritual and humanitarian causes.

There are some similar issues that the government needs to work on. God gave us all an intelligence and the wisdom to execute our potentials. What the world is suffering today is all man made, and not because of what God has made for man. Therefore we as individuals, as countries need to unmake and remake ourselves, so that humanity may flourish once again, and the world may live in peace and prosperity.

Maybe someone, someday may apply these basic principles, and this great country may come back to the road of happiness and prosperity.

God bless the world.
