Dear friends

I had been away to India and my newsletter is long overdue. These times have been difficult for the world, and we all hope that this coming year will bring some relief to the world. So lets see what the planets say!

On January 1st 2009, at 0600 hrs, the Sun will be in Sagittarius in conjunction with Mars, Moon will be in Aquarius with Venus, Mercury would be in conjunction with Jupiter in Capricorn, Saturn in Leo, Rahu in Capricorn and Ketu in Cancer.

These planetary positions show that there is going to be a continued restraint in financial sectors, and the transportation will become dear. The weather will be unpredictable, and all news channel weather forecasts will flop! Many financial and land/property scams will be exposed and set right. There may be some inquiry in the misuse of money and power in the military. Many such 'leaks' will be discovered and sealed.

On January 20th 2009, Barrack Obama will officially take over the office of president. The planets look very good for him on that day. Jupiter, Mercury and Sun will be together in Capricorn, Mars in Sagittarius, Moon in Scorpio.

Saturn and Venus opposite each other. This shows he will assume office in a very calm, controlled manner, but very strong in his applications and actions. People who think that he has little experience will see his power and prowess. He will take charge of the present situation with full responsibility and face the challenge. By the end of the year, he will have accomplished much, and the Christmas of 2010, will see a new face of America. But from January 28th right up to middle of March, he will face stiff opposition. The Muslim countries will pose a challenge, and there will be a lot of reshuffle in the military strategies. The Pakistan-Afghanistan border will be the big challenge, which he will take head on.

For India, this is going to be a good year. India will progress and prosper in many ways, and the financial situation will become much better. India will also collaborate with some Eastern countries and consolidate their position in the world. I see far east countries joining with India, even China.

I promise that America will see golden days again, but from next Christmas onwards. But like I wrote earlier, America needs to join hands with at least 3 countries, one of them being India, in order to reverse this financial and economic crises. There may be some changes in the constitutions, which will benefit America.

This is the year of Justice, of truth, of righteousness, and implementation of spiritual and human values. Considering what the world has become today, it may be difficult with a lot of opposition from disgruntled people, but the moment of truth has come, where the world has to re evaluate the drastic situation, and bring back humanity to the age of righteousness and peace.

I just wish that someone should send these predictions and wisdom to the president Barrack Obama, and to the people who matter, for it is up to them to implement some real changes, so that people of the world may live in harmony, peace and prosperity.

MAY GOD BLESS THE WORLD WITH WISDOM, FILL PEOPLE'S HEARTS WITH LOVE AND COMPASSION, AND HELP US DEVELOP PATIENCE, TOLERANCE, DISCRIMINATION, SO THAT HUMANITY MAY LIVE IN PEACE AND HAPPINESS.

God bless

Dr. Rakesh Kumar
