# Post US Presidential Elections 2012

– By Dr. Rakesh Kumar, Ph.D., November 7th 2012

Dear friends,

We have gone through a huge terror attack from Nature and the country has yet to recover from the damages and displacements.

Let me tell you as to why this storm was such a destructive one. It all started with the effect of the full Moon and then the Moon entered into the zodiac sign of Taurus with Jupiter, and Ketu and Mercury, Mars and Rahu opposite in Scorpio. Sun and Saturn were in conjunction in Libra. Saturn and Jupiter cause huge impacts upon earth. These planetary aspects caused such a huge imbalance of cosmic energies.

These kinds of planetary combinations can create some catastrophic and dangerous situations like terrorist attacks, wars and storms.

Then yesterday, November 6th we had the elections and as I had predicted in my earlier newsletters ([Newsletter of June 22nd 2012](#)), Barack Obama won the presidential elections.

But astrologically, the difficult times are not yet over. On November 13th 2012, we have this total Lunar eclipse coming up, which is also the New Moon. But the effect of Moon starts one day before and lasts until one day later. Therefore November 12th, to November 16th is going to be another difficult planetary combination during which there may be some storm or some other dangerous situation.

As per America's chart, there may be some secret conspiracy to unsettle the country. We cannot rule out terror attacks. There is going to be violent and disturbing situations in the Middle East and there may be bombing and shootings. Even the British Empire will face some challenges. Financial situations will be grim the national debt mounting and President Barack Obama will be much stressed out because of opposition from his enemies (Republicans). The only way out of this mess would be to adopt some realistic changes in the constitution and unconventional methods to bring in money to the federal treasury. America should opt out of wars and should only focus on its internal growth.

The government has got to stop the green card lottery system because of which 50,000 people get free entry into the United States every year. These 50,000 in turn end up totaling 250,000 to 400,000 adding their families. So how will the Americans get jobs? According to the federal government statistics in 2012, there are about 13 million plus illegal immigrants in the US, and the federal government spends about 113 Billion dollars every year to sustain them. (The cost estimates are based on an extensive analysis of federal, state and local spending data. *The Fiscal Burden of Illegal Immigration on U.S. Taxpayers* examines dozens of government programs that are available to illegal aliens and their U.S.-born children, both legally and fraudulently. The report provides detailed analysis of the impact of illegal immigration on education, health care, law enforcement and justice, public assistance, and other government programs.)

Therefore with such huge financial and other liabilities of illegal immigrants already in the US, it is foolishness to keep giving out free green cards to more immigrants who are all taking away jobs and businesses from Americans.

Then there are many other policies that the government can implement to stabilize the country and overcome the deficit of 13 trillion dollars. All they have to do is be realistic and live with times and circumstances. It's funny that with such serious problems at hand like 16 trillion dollars deficit, joblessness, wars at hand, having to deal with terrorism and safety measures, the topics that are of most popular in the US are abortion, gay marriages and legalizing Marijuana??????????

Mayor Bloomberg recently stated that the city would spend \$500,000 to facilitate gay marriages in NYC. Don't you think that half a million dollars could be used to rehabilitate those who have been stricken by the recent storm? Or for other progressive purposes to make the city a better place and to provide better facilities?

That's why I say that the leaders of this country should be realistic. There is this one person who can be realistic but there are many who will oppose him and block his ideas and implementations. That one person is Barack Obama. He did not fail in his 4 years tenure. It's just that the congress did not let him succeed in his mission. One president cannot run the country. He has to have the house of senate and other politicians support him. But they are not supportive of the president.

There are so many multi millionaires and billionaires in this country. Tell me one name who contributed to help those who were devastated by the super storm Sandy? The politicians ask the common man to donate, which they did. But the super rich did not even feel sorry or did anything to help. It was so gladdening to see that common people helped the disaster struck people the most. There was a great humanitarian touch and people spend their time and money to help the helpless.

This politics is a very sticky business and I'd better stay away from it. Now because of this difficult planetary combinations coming up, people who have the Moon sign of Aries, Taurus, Gemini, Leo and Scorpio should take care of themselves. It would not be advisable to travel between November 12th and November 16th. They should also take care of allergies, colds, flu, fevers and food poisoning. Water will be the cause of the problem, which could manifest in various ways.

This Christmas will be good for everyone and by then, the country will start on its progressive path. Businesses will do well this Christmas and the new year. And yes – The world will not end on December 21st 2012!

God has other plans!

May God bless everyone with health, happiness and peace and prosperity.
