To: "DR. RAKESH KUMAR" <ishwarcenter@gmail.com>

Hello friends,

It's been a while since I wrote my newsletter, and I thought now is the time.

You must have heard of a stern warning about a possible terrorist attack on Americans. This might be true. The last time, some planets that came in certain combinations was on towards the 3rd quarter of 2001. Yes, September 11th 2001 was when we had the terrorist attack on the World Trade Center in NYC.

On September 11th 2001, Jupiter was in Mercury's sign of Gemini, with Moon and Rahu, and had Mars and Ketu opposite in Sagittarius. Mars and Saturn both afflicted Venus in Cancer, which is why airplanes were used. Moon was in the constellation of Mars, the planet of violence, fights, destructions etc.

Jupiter came back into Gemini after 12 years in June this year. Mars came into Gemini on July 4th, and Moon entered Gemini on August 2nd. Mercury entered Cancer on August 4th. The Moon will be in Gemini until August 6th, which is a new Moon. This combination could be risky as there may be storms, high tides, floods and possibility of terrorist attacks. I must mention that all the planets are in the orb of Ketu and Rahu which are 180 degrees opposite each other and the other side of the zodiac is empty.

I have written in my earlier newsletters that whenever Jupiter was in Mercury's sign, when Moon was afflicted with aggressive planets like Mars, Rahu, Ketu, Saturn and when Mercury was in Cancer, there would be some difficult situation for America. The Moon enters into Scorpio on August 14th and thereafter, it breaks the chain of Rahu and Ketu, which really are the north and south nodes of the Moon.

This is a difficult time for President Barack Obama. He should take care of his cardio vascular system and nervous exhaustion. He will be under this planetary stress until June 2014. It would be better for him to wear a very light Violet Sapphire. This will protect him from any dangers. By the way, today is his birthday.

Happy birthday President Barack Obama!

But Venus will move into Libra on September 6th and join Saturn and Rahu there. Mars moves into Cancer on August 18th and will be there until October 5th. Moon will also move into Libra on **September 9th**. Thus with Saturn, Rahu, Venus and Moon together in Libra, Ketu opposite in Aries, Mars in Cancer, there could be another dangerous situation around! This could affect

many countries. There could be attacks, storms, transportation system affected and mass destructions.

India is also going to be affected by these planetary aspects. This also applies to its neighboring countries. There may be attacks, floods, difficult situations for the government and sports and entertainment industry people will also get affected. I foresee some water related disaster and some place of transportation where masses of people may get affected. Waters of rivers will overflow and there may be diseases that will spread. The financial conditions will be very restricted and economy will be jammed.

Now for individuals for all 12 Moon signs:

These predictions are valid from now (August 6th 2013), until October 5th at the most.

For Aries, this is a time for precaution, patience, tolerance, perseverance and getting ready for major changes in life. The challenge may be personal, change of residence and work related. Relationships with spouse and partners will be strained and may break. Mother's situation will also be of concern and there will be stress and tensions. Guard against temper outbursts and getting irritated easily.

For Taurus Moon signs, health may be of concern. Apart from this, they should take care about their work area as there may be negative people around who could cause trouble. There could also be some disturbing factors with siblings and spouses. On the brighter side, all these issues will be overcome.

For Gemini Moon signs, things will not be so bad, except concerns about their children and some health problems pertaining to blood circulation and digestive system. They should be careful about how they speak or else could get into trouble. They could also experience some problems in the mouth, teeth or throat area.

For Cancer Moon signs, there may have to leave their place of work, Or else, there could be challenges at work. Home front could be depressive and there could be concerns about children or else about their own health. But these are only temporary transits and will pass soon. The good thing is that Cancer Moon signs who are single may find a partner or develop a relationship with someone soon.

For Leo Moon signs, things should be looking up for relationships, happy unions, better work conditions, travels and unexpected connections. They will also be moving, but for betterment. Watch out for health conditions that may arise due to over excitement.

For Virgo Moon signs, there could be good news for children. This could be like children graduating, or some child getting married or getting a job. They will also make lots of money and do well generally. Although Virgo Moon signs are in their seven and a half year cycle of Saturn, but the next 10 months will be good for them.

For Libra Moon signs, challenges will be there for marriage, partnerships, relationships and this time could be a turning point in life. Children will do well and Librans will make new

connections or partnerships with foreigners which will prove beneficial for them. They too are in the middle of the seven and a half year cycle of Saturn and should exercise patience, perseverance and wisdom. Those who pass this test will prove to be the best. Jupiter has some blessing for Librans.

For Scorpio Moon signs, there could be sleep problems. They could also have some strain in family and relationships due to the Saturn Cycle and mother's health could become adverse. They should exercise calmness and wisdom in their approach towards life but generally will be secure. Scorpio Moon signs should watch out for blood circulatory problems and cut down on sweets and high sodium diet.

Sagittarius Moon signs may go through mental anxiety and stress and may suffer from problems with stomach and acidity. They may also have problems with the excretory system. The problems seem to do with food. Therefore they should come on a vegetarian diet and avoid greasy, spicy and gluten foods. Those with children may be facing some concerns about children or their health. It would be a good idea to keep an eye on them.

Capricorn Moon signs are in a time for caution and watch. The most important areas of one's life, that is, relationships, marriage, work, and home are all going to be under stress and scrutiny. Yes, watch is the key word. They may wear a Blue Sapphire to protect themselves against these challenges.

Aquarius Moon signs will generally be OK barring some issues at work or their health. They should keep their papers and documentations up to date. They may suffer from acidity due to nervous anxiety. Give food a thought and do not keep hungry for long.

Pisces Moon signs may also have some stomach problems and ladies may experience some problems with reproductive system. Children may be cause of concern. There may be some delays in property or rental matters. But all these will clear up by October.

You must be wondering as to why I am writing only the difficulties for most of you. You see, whenever these difficult planetary combinations happen, it may affect everyone in some way or the other. Your birth horoscopes will tell the whole story. It would be better to be advised on challenging times so that one is prepared to deal with such situations. Forewarned is forearmed, therefore one should take all precautions and wade through difficult times with an awareness of foreknowledge and wisdom.

May God bless you all.
