NEWSLETTER – MAY 19TH 2006.

Dear friends,

The 3rd week of May has started and some planetary changes have set in. The Sun has entered into Taurus on May 15th. Mercury moved into Taurus on May 16th, Mars moves into Cancer on May 25th. Venus moves into Aries on May 25th too. Thus we would have Jupiter in Libra, Saturn and Mars in conjunction in Cancer, and Venus in Aries. These planets in angular houses could create some difficult situations around the world.

It could be a bad combination for America, and India

too. America could expect some major storms, landslides and some serious land threats. This month and June /July could be a dangerous time. There could be some accidents or explosions. Huge water related problems and some shipping accident/tragedy or else oil spill/fire is very much possible. I also see destruction of some town somewhere south to southwest.

India will face some flooding situations. There will be some unusual weather there. The neighbouring countries are likely to get affected in some negative manner. Danger to General Musharraf of Pakistan. Great loss due to flood and land growths and agriculture could get affected. Many animals could die. Terrorists may strike with fire and bombs. Some explosion/fire could take place in some public carriers. A very dislodging time for some countries. Many people will relocate during this time. Some will change their residence, and some jobs. President Bush will have a very hard time during these months. Some major decisions will take place about some Muslim country, and could bring the situation to the brink of war.

I had written in my earlier newsletters I had made few predictions that this was a time for divine justice. One of the things that happened was the dismissal of the case of Alaya Rahm, who made some despicable allegations against Satya Sai Baba, the divine lord. All his accusations proved to be false, and by the statements of the prime witness it was proved quite to the contrary. The statements of Mr. Kraydick, the prime witness for the plaintiff proved that Satya Sai Baba was indeed divine. This was the divine justice. People forget that one of the main disciples of Jesus also betrayed him. They even crucified Lord Jesus, but that did not alter the fact that Jesus was divine.

I had mentioned "A great fire that burns on land" That could be the volcano that erupted in Indonesia recently, but this may not be it all. I had mentioned shipwreck, and on the eastern coast near Malacca straits, a ship with 500 people went down. I had mentioned that some eminent person could die during this time. The second in command of the opposition party of India, was shot and he died. I still foresee some great danger by fire and water. Places whose names start with the consonants of Cha, Ja, Da, Ka, Pa and Ba could be most susceptible.

Nature unleashes its fury because man interferes with nature. Man has taken everything away from nature. We have dug out all the nature's resources and there is a great hollow in the earth. The air that nature gave us has been so polluted by us. We have turned our own human nature into an animal nature. Love has been

replaced by hate, compassion has turned into greed and ambition, truth has been overturned by untruths, peace has been eclipsed by violence and wars, generosity has been overcome by selfishness, and so much so that man has dared to challenge God.

Really speaking, peace, love, harmony, contentment and bliss are not to be found in some shop in Manhattan, or in a temple or a church. It is all within us. We have shattered that peace into pieces, in our materialistic desires. In that lust for money and luxury, we have forgotten our true human identity and become demonic. All the problems that we are experiencing in the world today are not created by God, but by man himself.

God created man as potentially divine. As it is written in the Bible, that God created man in His own image. But maya, the great materialistic distraction and delusion has blurred our vision and our ego gives us another identity, which is different from the original, which is temporary and a creation of the mind. In reality, the soul is a spark of the creator. For example, a Diamond is basically carbon, just like coal. But coal is dark black, dirty, can burn out and reduce to ashes. But the Diamond is the hardest known substance known to man, and it cannot be broken or burnt. No matter what you do, it never loses its shine. Similarly, the soul, the Atma is potentially a divine spark, which never dies. It's the body, with its material senses and the mind, which is perishable.

Therefore we must do introspection, into our own self, into our purpose of life and revert to our true spiritual identity. Every act, thought and deed that are materialistically induced create karma and draws us further into delusion. Its like quicksand. As long as we indulge in our senses and play up to the mind, we will continue to experience joys and sorrows, good and bad, happiness and grief. It's a never ending story. But if we use our wisdom, master our mind and senses and relate only to the consciousness, then we would become free of consequences of karma and become free forever from this world of make believe, of pleasure and pain, joys and sorrow, of gain and loss and life and death.

The true Being is a one without senses, without mind, without body, without intelligence, without form, without qualities, without identity. The true Being is just consciousness!

God Bless

Dr. Rakesh Kumar
