Dear Friends,

In my last newsletter dated July 9th 2009, I had written about Michael Jackson, and the mystery about his death. As you must have read in the news and reports that came out two months later, after a very detailed investigation, it was revealed that his death was indeed caused by the drugs given to him, as mentioned in my newsletter earlier. Note also the times that I had mentioned about his deteriorating condition and the ultimate time of his death.

Now for the latest update and predictions. There has been a major transit on September 10th 2009 . Saturn moved into Virgo. Saturn moves in about 2 and half years. Saturn is the most dreaded planet in the universe. People are always apprehensive about its moves and aspects. Rahu and Ketu will soon move in November, which move after one and half years. Then Jupiter moves on December 20th this year. Therefore beginning from now, until the end of the year, and the year 2010, people will see some major changes around the world.

First of all, the United States of America will see some good changes

Dear Friends,

In my last newsletter dated July 9th 2009, I had written about Michael Jackson, and the mystery about his death. As you must have read in the news and reports that came out two months later, after a very detailed investigation, it was revealed that his death was indeed caused by the drugs given to him, as mentioned in my newsletter earlier. Note also the times that I had mentioned about his deteriorating condition and the ultimate time of his death.

Now for the latest update and predictions. There has been a major transit on September 10th 2009. Saturn moved into Virgo. Saturn moves in about 2 and half years. Saturn is the most dreaded planet in the universe. People are always apprehensive about its moves and aspects. Rahu and Ketu will soon move in November, which move after one and half years. Then Jupiter moves on December 20th this year. Therefore beginning from now, until the end of the year, and the year 2010, people will see some major changes around the world.

First of all, the country America will see some good changes. This begins the era of the up rise of the country, just as if it was granted independence. From December onwards, businesses, finances and many other sectors will show a positive growth. There will be treatise and trades with other countries and money will come in. But I also see much disagreement within the parliament members. Its quite possible that some people or someone may disassociate themselves from some posts or parties. Another interpretation is that some senior or important leader or a national icon may pass away. Ideas, laws and deals may get signed after delays, and will be slow to start off. But positive growth is surely happening for America. There will be emphasis on education, health, trades and laws on immigration. The government becomes stronger in armed forces and enemies will be vanquished. All these will happen within the year to come.

President Obama will lose some of his charm and glory, and will only come into limelight from May 2010 onwards. Hillary Clinton will prove to be very positive for the country from December onwards. She will do something positive with some Eastern countries. Even husband Bill will get some popularity. Joe Biden becomes tough, and talks tough! But he may experience some problems relating to the kidney or urinary tract. Acute acidity may also trouble him.

Mid September to end of October, there may be some big storms that may cause havoc. In fact towards the last week of October there is a dangerous combination which indicates that there may be some major natural calamity, or else, there may be some terror threat or some great health concern.

This information is not to put a scare into people, but to alert them to follow the ABC of life. **A**lways – **B**e – **C**areful! Forewarned is forearmed. Precaution and prevention can avert most challenges. It is very important to exercise wisdom,

and not to become a victim of mind and senses. Duty, discipline, dedication, right direction, discrimination and control over mind and senses are most important.

For those who have the Moon sign of Virgo, Scorpio, Pisces and Gemini should be ready to face some challenges during this Saturn transit. They are going to be swimming against the tide of time. For those who have the Moon signs of Libra, Leo, Aquarius and Taurus will heave a sigh of relief and things will get moving for them in a positive flow. These are just general influences. The exact nature of planetary effects will depend on the individual's birth chart and the placement of planets therein. It's a good idea to start praying on Saturdays, rather than "preying". This preying refers to our materialistic indulgences which cater to wrong pleasures of sense gratifications. (Saturday is the day attributed to the planet Saturn.) Therefore praying, being vegetarian by food, though and deed helps in overcoming some difficult Karma.

May God give us the wisdom to understand our Karma. May He give us Love, so that peace and prosperity may prevail. May He give us faith, so that we live in harmony. May He give us freedom, from Maya, the delusion, so that we all live in truth, righteousness, peace and love.
