To: "Rakesh" <rakesh\_ishwar@yahoo.com>

Hello friends,

In this newsletter, I shall discuss the monthly forecast for America and an insight of the influence of 2 major planets that are about to move and how these planetary shifts affect people on basis of their Moon signs. I have spoken about this and some more in a radio program yesterday, called the Heart of Mind, on WBAI radio, New York , FM 99.5 from 10 to 11 pm .

The major planet Saturn recently moved from Leo into Virgo on September 10<sup>th</sup> and many people have started to feel the impact. This month, there is going to be a difficult planetary configuration which is going to affect the country, and its leader. With effect from October 11<sup>th</sup> 2009 , all planets are going to be in a chain formation on one side of the zodiac. This is going to create some unbalance in the universe and generate some destructive energies. Sun, Mercury, Saturn and Venus are all conjoined together, and Jupiter and Mars are in opposition, both in signs of debilitation. They are also in conjunction with Rahu and Ketu. The Moon also moves into cancer, with Mars and Ketu.

To read more about the effect and influence on America, India and individuals, read the entire article and predictions in the website. Please click on the link <http://ishwarastral.com/newsletter.htm>

May God help humanity and bring peace and harmony in the world.

God bless all.

Hello friends,

In this newsletter, I shall discuss the monthly forecast for America and an insight of the influence of 2 major planets that are about to move and how these planetary shifts affect people on basis of their Moon signs. I have spoken about this and some more in a radio program yesterday, called the Heart of Mind, on WBAI radio, New York, FM 99.5 from 10 to 11 pm.

The major planet Saturn recently moved from Leo into Virgo on September 10<sup>th</sup> and many people have started to feel the impact. This month, there is going to be a difficult planetary configuration which is going to affect the country, and its leader. With effect from October 11<sup>th</sup> 2009, all planets are going to be in a chain formation on one side of the zodiac until November 17<sup>th</sup>, when Rahu and Ketu shift their axis and move into Sagittarius and Gemini respectively. When all the planets come within the orb of Rahu and Ketu, and seven other planets come within the orb, such a peculiar formation is called "Kaalsarpa Yoga". This is symbolized as a serpent. This is going to create some unbalance in the universe and generate some destructive energies. Sun, Mercury, Saturn and Venus are all conjoined together, and Jupiter and Mars are in opposition, both in signs of debilitation. They are also in conjunction with Rahu and Ketu. The Moon also moves into Cancer, with Mars and Ketu.

This planetary combination is very dangerous and could pose a risk to the country. I had mentioned in my last newsletter about a month ago, that there could be some natural calamity or else, a terrorist attack or threat towards the last week of October. You must have heard on the news about a terrorist who was arrested a couple of weeks ago, and that they were planning to attack the city of New York. Well, I say that the threat is even more apparent now. This is a time to be very cautious and alert. I see religious fanatics hatching or planning something very soon. I also foresee that places near water, schools and financial companies and institutions or public transportation areas could be affected. Some storms could be around the corner soon, which could affect the south coast and there could be many losses.

There could be some terrorist attacks in India also, and again, cities near water and religious places could be the targets. This period may create some destruction by way of natural calamities like earthquakes, unusual floods, and the oceans and seas may become very rough and there could be abnormal tides. President Barrack Obama could be facing great mental stress and some hidden dangers. His wife's health will also be affected during this month.

Generally, this is a bad time to travel, or to make any major decisions like major medical surgeries or procedures. People may be advised not to invest in real estate or any overseas businesses during this month. This is a time to lie low and just lead a regular life and to be alert and focused. And Pray!

Financial burdens continue for America and there could be great pressures to deal with regarding other countries. The allies and partners will be disagreeing with America and the country will be left dealing with war and other situations alone, without much support.

But from December 20<sup>th</sup> 2009 onwards, there will be some positive changes and America will start doing well again. I see that the financial situation becomes stable and good. I also foresee many new ideas and ventures come into effect. This starts the era of a huge relief and happy days will be here again! From November 2011 and thereafter, the country will be booming in full glory.

Those who have the Moon sign of Leo, Virgo and Libra are under the influence of the seven and a half year cycle of Saturn, and things will be difficult for them. The planet Rahu moves in November and Jupiter moves after mid December, so there could be good times for some, and challenges for some, depending on their birth charts. People should not confuse the Moon signs with Sun signs.

The western method of calculating the Zodiac signs is quite different (and wrong) from the actual one. The western Zodiac is called Tropical, and Zodiac calculated by the Hindu Vedic Astrology is called Sidereal. Western astrology calculates the Zodiac with the Sun's entry into the first point of Aries. We all know that the Sun and Earth are in a relative motion, so obviously any calculations made between them are bound to be variable. The western system did not take into account the precession of the equinoxes, which is the tilt of the Earth's axis. Because of these two principle errors, the western Zodiac is out by about 22 degrees from the actual Zodiac, which is truly calculated from the first star in the belt of Aries, since stars are fixed objects in the skies. Therefore if the planets are wrongly placed in the Zodiacs, the predictions and interpretations are going to be wrong.

Sometimes, these difficult planetary combinations come around and all we can do is be forewarned, and pray that all will be well and this negative configuration of planets get out of each other's orb soon so that we may relax again. Forewarned is forearmed, and it's always better to assume a danger and take every possible precaution, rather than throw caution to the winds. Who knows, by heeding some advice, some people may have saved themselves from some major disaster. If nothing happens, you are safe anyway, and will have done some introspection and prayers, which will surely benefit you!

May God help humanity and bring peace and harmony in the world.

God bless all.
