Dear Friends, [Dr. Rakesh Kumar's Newsletter July 4th 2012]

I had predicted in my last newsletter that there would be unusual weather and there could be some storms. You must have heard of the storm that hit Virginia and 3 million people were without power. You must also be aware that the heat in the country has been unusual and broken all records.

Between today (July 4th) August 4th, there may be some difficult land related situation in the U.S. and there may also be a war like situation between now and end of September this year. There could be some bombings, fires and destruction. In the U.S., the south and west areas are vulnerable and there could be some serious problems in the Middle East.

Countries and cities with names starting from the sound of Pa, like Persian Gulf, Pakistan, Palestine and the names with sounds starting from Ka, like Karachi and names from the vowels (A,E,I,O,U) could be most susceptible. There could be some religious fights and vehicular crashes between now and end of September. August 17th is a new moon and the dates August 15th to end of September could be dangerous and there could be storms coming up that would create disturbances and destruction around. Apart from Storms, there would be many other issues that the Government may have to deal with. There could be much mudslinging between the big political figures in the U.S. congress. (Mitt Romney!!!)

Decisions would be challenged and there may be confusion within the country. The U.S. will be challenged and situation could get bad.

The United States should be very cautious and should not get into a war, which may be provoked. The U.S. should exercise great restraint in its military actions or else there could be great losses and the U.S. will be criticized by many countries. If the U.S. gets past September 29th 2012, then things will start looking up for the country. But until August 4th, there could be some dangers. Ships and aero planes may crash and many could die. But these can be avoided by not taking any drastic steps and exercise restraint and take all precautions.

Things don't look very good for Hillary Clinton now. She would experience some serious health related problems, and she may have to have surgery. Her husband Bill too, will suffer from heart problems. There may be some constriction of the arteries and he may also have some kidney or urinary tract problem. After June 2013, Hillary will be acclaimed and may be given some award or reward.

Simple Simon Vice President Joe Biden may expect some challenges too. His seat is in question and he may have to sweat until 1st week August. After that there may be some

changes in his life. And possibly his career.

President Barack Obama will be stressed out and may suffer from nervous and heat exhaustion. This will happen from 1st week of August and he will be under stress continuously thereafter for the next two years. He may suffer from palpitations. His wife Michelle may also expect some stomach related problems and also reproductive system problems. There could be some growths that have to be removed. She may have concerns about her children. She should try to control her anger and deal with situations in a balanced manner, or else she may give poor Barack a hard time!

I have already written about Mitt Romney in my previous newsletter. He can go huffing and puffing and talk loud and boast egoistically, but his luck will run down From August.

I can assure you that if Mitt Romney becomes the President, the United States will face another tenure of war. He will talk tough, act tough and destroy peace. People of America don't want muscles now. They want meals. They don't want war, they want peace. They don't want another jerk. They want work. Americans want prosperity and growth. They want their jobs and believe in live and let live. That can only happen if the Presidents and Prime ministers of countries don't go to war.

Let all faiths and countries flourish. Let there be peace, love and harmony. Let there be brotherhood of man and fatherhood of God. Maybe we should start a world peace forum and get the message to leaders of all countries around the world to let go of power and destructive attitudes and deal with every situation with peace.

Yesterday, we heard in the news that after spending millions and billions of dollars, the scientists discovered that indeed, there is a GOD particle. They cannot exactly describe it, but they found that GOD particle to be the origin of all creation. Now will someone tell these fools that we knew this all along! From the moment of our birth! Our scriptures have said it, the ancient sages have said it and we believe that God exists. God is Omnipresent and is in every minuscule of the universe. Why then spend millions and billions and make your country financially hollow? Same thing with sending rockets into space, and trying out the big bang experiments. Why can man not try to invent some fantastic method by which there could be food growths in deserts and sands? Why don't they try to find out some way so that people can get water to drink? Why can scientists find out some ways to bring peace and prosperity to the world? Why create Nuclear bombs to destroy humanity? God created the beautiful world and man will destroy it because of greed, ego, hunger for power and hatred.

What happened to love and peace? What happened to truth and righteousness? What is becoming of man and mankind? I pray to God to charge that 'God particle' in man so that man can be unmade and remade with a heart full of love and compassion for a fellow human being and for all creations that God made.

God bless

Dr Rakesh Kumar
