ASTROLOGICAL PREDICTIONS/NEWSLETTER, APRIL 10TH 2013 – BY DR. RAKESH KUMAR

Dear Friends,

This month of April of 2013 has some difficult planetary combinations and this could create quite a few dangerous and chaotic situations. The new Moon starts from tomorrow, April 11th 2013, and then Mars jumps into the zodiac sign of Aries on the 12th, and then the Sun comes into Aries on April 14th. Thus we have Saturn and Rahu in Libra, and Sun, Venus, Mars and Ketu opposite. This can create a volatile aspect. The next 3 weeks following will be a period to watch out for.

There could be violent storms, earthquakes, accidents, landslides, floods and even sporadic violence in many parts of the world. A dangerous war like situation may develop during this time. The weather will be unpredictable and there could be some electrical outages on land and discharges in the skies. Thunderstorms and unusual tides will cause disasters. Some technical faults will happen in the space projects and which could destroy apparatus. There will be some electromagnetic storms in our solar system which could affect the earth's atmosphere and create a torque on earth's geocentric axis.

These kinds of planetary situations could lead to fires, missiles and bombings. Countries will be on red alert. Not only North Korea, but Islamic terrorist countries will also be very active. There will be many bombings, explosions and fires. Civil violence and crimes will increase during this time. Taliban-Afghanistan area will also be disturbed. Middle and Far East may get hit by typhoons and storms, flooding and natural disasters. Pakistan will see some strong Military action and there could be a takeover. India too, will face many challenges to the government. There will be chaos, corruption and violence. Overall, evil and negative energies will play havoc during this time. This time period is going to be very difficult for many countries.

Some famous personalities will fall from grace and there may be some deaths. These times and planets take away some souls as they finish their cycle of life.

For the United States of America, after June 1st, some favorable changes set in. Amidst threats of wars, terrorist attacks and rebuilding after storms, this country will start looking up financially. More businesses and jobs will open up and the treasury will start loading again. From June of 2013 and 12 months following thereafter, there will be some unexpected progress in the country. There will be some new medical breakthrough. But President Barack Obama will go through tremendous anxiety and stress.

This time is also not good for the Clintons. Bill Clinton may suffer from cardio vascular spasms and need medical help. Hilary and /or her daughter may get some recognition and will raise some expectations and hope.

Since these kinds of planetary aspects may affect every person in some way or the other. What can be different is the degree of influence and how people are able to understand and balance these situations. If wisdom and patience prevails, then they too, shall prevail. It is important to be spiritual and pray during these times.

Water borne diseases and new viruses may affect many people. There may be food poisoning and new kinds of diseases may affect people. Illnesses relating to blood, Respiratory system, and something that affects the nervous system, heart and circulatory system problems may show up. This will not happen to everyone, but only some people whose planets in their birth charts get affected.

For those who have the Moon sign of **Aries**, may be susceptible to accidents and illnesses. They have to be careful and watch their diets and not exert themselves. Caution, care and control are the key words. Travel is not a good idea for Aries people.

Taurus Moon signs should also be careful of their health and money. They may lose money or may get into trouble with the law. Therefore should drive cautiously, file their taxes properly and keep clear of any place where there may be fights or disputes. They should keep away from gambling and not borrow or lend money. Be careful of litigations.

Gemini Moon signs should watch out for their diet as they are likely to get sick due to food. They may experience stomach problems, food poisoning and heartburns. They should also keep an eye on their children as there may be some unexpected difficult situations regarding their children. Try not to be volatile with friends and relatives. Keep calm.

Cancer Moon signs may experience some shake up at their work area and could become victims of bad vibes and bad reports from colleagues and bosses. They may have to go through a difficult time with work or business and may lose on these areas.

Leo Moon signs may be travelling and may also experience some delays or difficulties in their travels. They may have health or security related problems. Some of you may have to leave home and may have a difficult time adjusting to the new premises.

Virgo Moon signs need to be careful about dangers from accidents and may be susceptible to problems with the excretory system. They may experience problems related to blood, bleeding, inflammation, Hemorrhoids and danger to life for some. Therefore eat healthy, mainly vegetarian foods, fruits etc. This may not be a good time for operations, surgeries or any major medical procedures. Postpone until after 15th May.

Libra Moon signs may have some traveling to do for their work or business. They may be stressed out physically and mentally. But new opportunities may come their way. They may also experience some stress due to their spouses and /or children. Libra moon signs should watch

out for blood pressure, palpitations, and ENT problems.

Scorpio Moon signs could experience some sleep related problems, which could be due to tensions and may also experience some problems in the lower abdomen and digestive system. This may be due to acidity and indigestion. They may also experience some urinary tract related discomfort.

Sagittarius Moon signs may also have stomach related problems and also problem with the reproductive system. Those who are pregnant may face the risk of miscarriage or abortions. They may also suffer from hyperacidity and inflammation of intestines. They should be careful while driving and eat only good and healthy food. Refrain from animal foods as they may cause problems.

Capricorn Moon signs should watch out for disturbances at home front, as there may be difficult situations and married people could face separation or may leave home. They could be susceptible to heart problems, both emotional and physical. They should not get into altercations and in any fights or disputes. Indications are that there may be changes coming for them during this period. This is not a good time for medical procedures unless absolutely necessary.

Aquarius Moon signs may generally be OK but should avoid any debates or disputes with their siblings. They may expect some difficult times to their fathers and siblings. In some cases, their spouses may get affected. Ego destroys harmony and peace.

Pisces Moon signs should take care of the mouth, teeth and throat areas. They should also take care of their eyes and excretory system. Nothing major to worry about, but this may be a transitory effect.

You must be wondering why I have written such difficult times for everyone and nothing good about anything. Well, as I said earlier, these effects depend on the planets in your birth charts, but these planetary transits could affect everyone in some way or the other, partially or wholly. Forewarned is forearmed, therefore it is better to know what kind of effects to expect, so that when it comes, we are in a better and wiser state of mind to deal with the situations. Undoubtedly there will be many good things for many people, but this kind of complicated planetary transit CAN create very difficult situations, like the storm Sandy did. Therefore PLEASE take every possible precaution and be safe and well.

May God help all and bless all.
