Horoscopes of the two U.S Presidential candidates in 2020

Donald Trump

Trump was born on June 14th 1946 at 10:54 am, New York.

As per his horoscope, he was born on a full moon day, Friday. His planets show that he initially inherited business from his father and made money from real estate. Later went into hotel and luxury business.

He was born in kaalsarpa yog, which is when all the planets are in a 180 deg orb of Rahu and Ketu. People born in such combinations can be super flops or super successful. Many great and successful people were born in kaalsarpa yog. His moon is in Scorpio with Ketu, indicating that he may be moody and outspoken.

His Mars is very strong which shows he will be a powerful man. He began the major period of Jupiter in March 2016 which really favored him to win. His Jupiter has benefic rays on his Sun which catapulted him to the highest office.

His horoscope shows that he will have 3 wives. Two older connection or older, then younger and then youngest. It also shows someone of a different nationality. The 3rd wife would be lucky for him. Melania's horoscope is very powerful and it shows that her husband will be much older and will have much money, power and position. It is in her destiny to enjoy a royal status. Whatever people may say about her but she is has good karma and follows some righteous principles.

Back to Donald, his planets show that this year will be good for him. But the Election Day Nov 3rd 2020 is a bad day for America. Moon will be with Rahu and Ketu, Sun in debilitation under severe pressure from Saturn, Venus also debilitated with influence of Rahu. There may be a postponement of the Election Day. Or the outcome of the election will be bad. Any time after Nov 20th will be good. Someone should tell the President this!

Vice President Mike Pence

Mike Pence was born on June 7th 1959 in Columbus, Indiana. His chart is very good. He has Jupiter opposite Sun and Mercury indicating a person of intelligence, high position and good sense of judgment. His mind will be stable and he is a man of principles, understanding and sound decisions. That's why he got a law degree. He is a responsible man with righteous and spiritual values. His planets also indicate that he may come back into position from Nov 20th 2020.

Joe Biden

Joe Biden was born on Nov 20th 1942 in Scranton, Pennsylvania. Joe also has some strong planets in his chart. He has Mars and Mercury in Libra with Moon opposite in Aries. He has Sun and Venus in Scorpio with Saturn opposite and a strong Jupiter in Cancer. That's how he became vice president. I don't know his time of birth but in some places it says 08:30 am. His time was good earlier but from 2015 onwards Saturn decided to cut out his position. His time does not look good now. He may face health problems pertaining to blood pressure and some neuralgic problems. His position in office does not look promising anymore. I think he should step back and focus on his health. Like Michael Bloomberg did. Good man, bad time!

I don't know whether to say Go Biden or Joe Bye den.

While this world crisis is on due to covid19, I feel very soon there is going to be decline of cases and some vaccine or remedy will be found. I somehow have a feeling that it will come from India. The coming days are very powerful for India and this country could come to the rescue for the world, in spite its own challenges.

Reminding everyone of some changes to bring in your lives for good health. Do not eat animal food. This includes eggs, fish, chicken or any kind of meat. Here is some important information about the great benefits of vegetarian foods.
